BLUE
RIBBON
PRODUCT
GUIDE

Blue Ribbon Products began in 1900 as the International Metal Polish Company, specializing in products for cleaning and polishing silver, brass, copper, and chrome. With the onset of automotive finishes during the first part of that century, it was discovered that metal polishes had similar chemical compositions to what we currently use as polishes for automotive paints. Thus, a new company was born: Blue Ribbon Car Care Products.

Over the years, Blue Ribbon has stayed at the forefront of the industry through constant research, development and innovations to assure that we provide the best products for our customers and their ever-changing needs. In fact, Blue Ribbon prides itself on providing the highest industry standard in the quality of our products and superb customer service. This is what sets us apart from our competitors.

THE AMERICAN STANDARD IN MANUFACTURING SINCE 1900

We're proud to be one of the best manufacturing companies in the US. It's a distinction that we've enjoyed for decades. One that we've earned by our commitment to hard work, continuous innovation, listening to our customers, and scaling our company as the industry evolved.

At Blue Ribbon Products, we're here for the long haul. Our company offers one of the most complete and extensive lines of products in two product categories: professional automotive reconditioning products and specialty home cleaning products. Our products are sold world-wide through our exclusive distribution network. Our headquarters in Indianapolis, Indiana, also known as the Crossroads of America, is located in the heart of the Midwest. Because of our location, our products can be distributed faster to any location in the United States or internationally due to our close proximity to major shipping hubs and ports.

If you are looking to sell products under our Blue Ribbon brand or on a private label basis, we'd love to sit down and have a conversation with you. Just give us a call and one of our team members will be happy to assist you.

OUR COMMITMENT TO YOU...

We stand by our word and our relationships. At Blue Ribbon Products, we consider ourselves a division of your team. This means that our focus is to provide the very best in professional automotive reconditioning and specialty household cleaning products. We want our customers to know that we care. If there is a problem with a product or if you're unhappy for any reason, contact us, and we will make it right.

OUR COMMITMENT TO THE FUTURE...

It's not enough to create a great product that's been around since 1900. Throughout the years, we've had hundreds of formulas that have been tested, sampled and executed. And every year, we sit down and analyze our product lines, gather customer feedback and get to work on innovating for the next generation of products. Our promise is to ensure that we continue to evolve in our industry, improve our processes and integrate new ways of doing business as new technology emerges.

MATRIX™ ORIGIN POLISH

HIGH-PERFORMANCE BODY SHOP PRODUCT LINE

FEATURES AND BENEFITS

- Contains no silicon, wax or fillers
- Advanced Nano Technology helps provide a deep lasting shine
- Low dust for easy clean up
- Hologram finish-free
- Superior, defect-free results
- Zero percent of scratches resurface after alcohol rubdown

APPLICATION

HIGH SPEED BUFFER
DA POLISHER
HAND

Matrix Origin High Performance Polish is our most advanced polish that offers superior, defect-free results for critical, high-end applications. This "hologram free" product produces low dust and utilizes Nano-abrasive technology to remove light to moderate paint imperfections while achieving excellent surface quality and shine. This polish is body shop safe and contains no silicone or fill-in glaze or wax. It can be used safely on fresh paint or soft clear coat finishes.

El Pulidor de Alto Rendimiento Matrix Origin es nuestro pulidor más avanzado que ofrece resultados superiores y libres de defectos para aplicaciones críticas y de alto nivel. Este producto "libre de hologramas" produce poco polvo y utiliza tecnología nano-abrasiva para remover imperfecciones ligeras a moderadas de la pintura mientras logra una excelente calidad de superficie y brillo. Este abrillantador es apto para taller de carrocería y no contiene silicona, esmalte de relleno ni cera. Se puede usar con seguridad sobre pintura fresca o acabados de capa transparente suave.
